EXPERIENCE

Organimi

March 2026 – August 2026

Solutions Engineer

Toronto, ON

- Led technical discovery and solution design for enterprise, commercial, and SMB accounts, leveraging **LogRocket** to identify **UI/UX** friction points and architecting custom schemas to map unstructured data into structured organizational hierarchies
- Diagnosed and resolved technical onboarding blockers by analyzing Zendesk support trends and session data, reducing manual troubleshooting time by **15%** and ensuring high-integrity data flow for prospective users
- Partnered with Engineering to resolve API-level integration issues (**SSO, SFTP, Webhooks**), ensuring seamless data synchronization between customer HRIS systems and the platform
- Collaborated with Product and Engineering to define requirements and launch a **global search feature**, hosting a customer-facing webinar to drive adoption and gathering post-launch feedback to inform future iterations
- Synthesized field insights from Zendesk and LogRocket into actionable **product feedback**, collaborating with Product teams to refine internal data flows and improve end-to-end customer onboarding

Salesforce

June 2024 – March 2026

GTM, Team Lead

Toronto, ON

- Partnered with Enterprise AEs to drive technical qualification for Pharma accounts, utilizing usage-signal analysis and data trends to identify **\$4.7M** in expansion ACV
- Spearheaded data-driven health monitoring, identifying **churn risks** by analyzing customer engagement metrics across a complex, regulated enterprise portfolio
- Managed **cross-functional** workstreams between Sales and Product to resolve operational bottlenecks in complex, regulated data deployments
- Consistently ranked on the **#1 GTM team in North America** for performance

The Daebak Company

June 2023 – January 2024

Product and Operations

Remote

- Coordinated cross-functional workflows between product, marketing, and operations teams to align on priorities and accelerate execution of key initiatives
- Supported data-driven product decisions by conducting **SEO analysis and customer research**, identifying conversion bottlenecks and contributing to a **10%** improvement in website conversion rates
- Built dashboards and KPI reports to support leadership decision-making and track campaign performance
